iOS Software Engineer · Chicago, IL · abdel.elsayed18@gmail.com · (646) 886-3472 · abdelrahman-elsayed.netlify.app

SUMMARY

iOS Software Engineer with **5+ years** building user-facing native apps at scale using Swift & SwiftUI. Led iOS development of real-time voice chat (OpenAI Realtime API), an AI shopping assistant, and payment/wallet flows at Lowe's — working closely with BFF and backend teams throughout. Experienced in ADRs, KMM cross-platform collaboration, and contributing across multiple product teams.

EXPERIENCE

Lowe's Companies, Inc — iOS Software Engineer

Chicago, IL (Remote) | Oct 2021 – Present (5 years)

- **Architected & implemented real-time voice chat** for the MyLow AI Shopping Assistant using the **OpenAI Realtime API**, enabling low-latency, bi-directional voice conversations within the Lowe's iOS app.
- **Led iOS development of the MyLow AI Shopping Assistant**, working across the BFF layer and collaborating with backend teams on product discovery, ordering, and conversational flows.
- **Owned the iOS payment & wallet flow within the AI chatbot**, including a full Apple Pay integration built from scratch, improving in-chat checkout efficiency and reducing purchase friction.
- **Contributed across multiple product teams** — including MyLow, Wallet, and Search — stepping in to support iOS feature delivery wherever needed, maintaining momentum across concurrent initiatives.
- **Collaborated with Android engineers on Kotlin Multiplatform Mobile (KMM)** shared modules, aligning business logic across platforms and accelerating cross-platform feature delivery.
- **Authored ADRs and PPRs** and drove **POC development**, contributing to technical direction and de-risking roadmap decisions across engineering, product, and design.
- Led iOS modernization converting ~40% of legacy UIKit to SwiftUI — **reduced app load time by 22%** and **memory usage by 35%**.
- Implemented **Google Ad Manager (GAM)** banner ads in search, generating **+10% direct mobile revenue** in Q1 post-launch; migrated in-house analytics SDK, boosting engagement metrics by **15%**.
- Maintained **95% code review pass rate** and zero critical production bugs over 6 consecutive months; regularly tapped for high-priority, time-sensitive deliverables.

Digital Tectonics, LLC — iOS Software Engineer (Contract)

Remote, U.S. | Oct 2022 – Jun 2024

- Rebuilt iOS app architecture with **SwiftUI & MVVM**, improving maintainability and long-term scalability across client projects.
- Designed a standardized UI component library, reducing design inconsistency and speeding up delivery cycles.
- Translated client requirements into intuitive, high-performing iOS applications through close collaboration with stakeholders.

TECHNICAL SKILLS

Languages: Swift · SwiftUI · Kotlin · JavaScript · Java · React

Frameworks & APIs: UIKit · SwiftUI · CoreData · MapKit · OpenAI Realtime API · Kotlin Multiplatform Mobile (KMM) · Apple Pay / PassKit

Architecture & Practices: MVVM · ADRs · PPRs · POCs · TDD · Code Review · Agile / Scrum

Tools: Xcode · JIRA · Confluence · Jenkins · Postman · Charles Proxy · Proxyman · SonarQube · Git / Stash

EDUCATION

City University of New York — College of Staten Island

B.Sc. Computer Science, Minor in Marketing | 2018 – 2021
